

30" Wi-Fi Friendly Structured Wiring Plastic Enclosure, Empty

Product Detail

Overview

Wavenet's 30" Plastic Wi-Fi Friendly Enclosures are an ideal solution to consolidate and distribute wired and wireless home networks from a single, centralized location. These enclosures are designed to be installed in single family homes, apartments, condominiums, multi-dwelling units (MDUs), and retrofit or custom homes. Constructed from strong ABS plastic, these enclosures are designed to integrate wired and wireless devices into traditional structured wiring installations with no signal loss. The 30" Plastic Wi-Fi Friendly Enclosures allow the full reach of a wireless network, as opposed to standard metal enclosures that can limit the range of the wireless signal.
